

Product Description

i Inspire Insoles are custom designed and Manufactured Foot Orthoses (FOs) to meet the requirements of individual patients. The 3D-imaging of the plantar surface of the foot is captured in weight bearing phase through a purpose-built scanner. These images are then used to design and manufacture fully customized insoles in variety of hard and soft materials.

Product Features

i Inspire Insole helps to prevent various medical conditions including:

- Plantar fasciitis and inflammation
- Pain on the inside of the knee
- Back pain
- Metatarsal pain
- Ankle sprains

Why *i* Inspire Insoles?

- Custom Designed Insole
- Low Fabrication Cost
- Reduced Manufacturing Time
- Higher Customer Satisfaction
